

**Build Afghanistan Engineering
Services (BAES)**

Construction Material Testing Laboratories

**A FULL-SERVICE MATERIAL
TESTING AND ANALYSIS
LABORATORY**

BACKGROUND

We are pleased to introduce Build Afghanistan Engineering Services (BAES) as an advanced multi-disciplinary lab established in Afghanistan. BAES established on 30 Nov 2011. Our labs are accredited by and certified by Afghanistan Investment Support Agency, (AISA), USACE, UNOPS, MRRD, IRD, USAID, and MOUD. The company is promoted by Afghan Engineers in association with USACE Technical Services, one of the leading technical labs over the Middle East region. BAES is playing a major role in the growing advancements witnessed in the country by providing technical testing and inspection services in various fields for sustainable development with ensured quality and controlled environment. BAES conducts its business in a manner, which demonstrates technical competence and reliability and in return provides its clients with cost effective, quality, and on-time services. The management and the technical team of BAES have thoroughly reviewed the levels of requirements to render quality services and thus have developed the necessary infrastructure to offer a complete range of services and have further proposed to develop the company capabilities in a progressive manner.

VISION

Our vision is to become a diverse company by incorporating our proven experienced reputation and encouraging innovation and growth to be the leading construction lab in the High country through creating a safe and helpful working environment for all. Our team is dedicated to assuring our customers' projects turn their dreams into a reality.

MISSION

BAES is committed to finding the best way forward, in a fast moving and highly competitive in Construction world and bridging the ever-growing technological innovations and the best service standards. Our aim is to provide our client with top quality products and services that any given contract may require. We have strict quality management and performance Criteria. Our staff consists of highly professional individuals from the various fields in which we work. We believe in striving for excellence in all projects.

OUR CAPABILITIES

We provide an extensive scope with capacity to conduct large testing programs to deliver clients with a reliable and accurate service. BAES professional standing and commitment to the highest standards of quality, safety and health is reinforced by international standards. Furthermore, our company's research and development have allowed for our in-house testing methods to be approved by USACE. We can offer you more than just test results. A key to our service is technical support, practical recommendations and solutions using a wide range of technical equipment and software analysis tools which enables you to tap into a wealth of geotechnical and materials technology experience and capabilities. Over recent years we have developed sophisticated operational software packages to ensure efficient management of test requirements and reporting. This system is available in all of our permanent and field laboratories.

House # 03, Southern Street of Russian Embassy
Dar-ul-Aman Road Kabul Afghanistan.

BAES IS YOUR TOTAL SOLUTION

BAES offer a wide range of laboratory testing services including:

- Soil Testing.
- Aggregate Testing.
- Cement, Grout, Mortar and Concrete Tests.
- Masonry Test.
- Asphalt Cement Concrete.
- Bricks, Stone, and Concrete Masonry Units.
- Chemical Analysis.
- Steel Testing.
- Geotechnical Engineering services.
- Water well and water Testing.
- Field & Laboratory Soil Testing.
- Topographic survey.
- Hydrological services.
- QA/QC Monitoring and inspection services
- QA and QC Training services.
- Construction chemicals services.

BAES Laboratories offering services in all provinces of Afghanistan.
